

Indiana's Telepone Privacy law is working extremely well at my house. The calls have totally stopped except for the very few exceptions allowed. Please do not attempt to fix this law that Indiana has gotten right (drafted effectively). Any attempt on your part will reduce effectiveness of the Indiana law because the FCC will attempt to please a broader constituency. Also, the FCC opening the issue will allow parties that oppose the law another opportunity to influence rule making.

Please close your proceeding with no action.
